

Database Project spring 2024

That One Team

August 19, 2024

Getting Started

Welcome Team members! We have been tasked with creating a database, There are a few things to make sure of before we embark upon this journey.

1. Have a Github account
2. Have an SSH or GPG key setup
 - **Set this up for both authorization and signing.**
3. Pull the Repo.
4. Add your name and ID to the README.
 - The README is an org document.
 - It is a form of markdown (can be converted to HTML if we need to write a front end.)
 - for the full org mode editing use the Emacs text editor. (This is not required any editor will work.)
5. Check out the discussions page.
